When Single Track is used, Eastward Trains are Superior to Westward trains of the same class.

At Portland, between Union Station and 18th Avenue on Eastward Main Track and 15th Avenue on Westward Main Track, Trains and Engines will be governed by Portland Terminal Railroad Company Rules.

At Willbridge, all trains from the Sixth Subdivision, will require a check of register in train order form.

At North Portland Jct., trains will not be required to comply with Rule D-83.

At Vancouver and Willbridge, trains will register by ticket per Rule 83(A).

At Vancouver, all westward trains, except first class on Terminal Sub-Division, will require a check of register in train order form.

SPEED RESTRICTIONS

All Subdivisions—

Reduced speed limits are designated by advance warning signs set in an upward angle of 45 degrees and indicate by numerals the permissible speed. Reduce speed signs, hexagon shaped, are located at the beginning of the restricted territory and also indicate by numerals the permissible speed through the restricted area. Resume speed signs bearing the letters "RS" or colored green without any lettering indicate the end of the restricted territory. On the Terminal, First, Second and Third Subdivisions, advance warning signs are located 5280 feet, and on all other Subdivisions, 3000 feet in advance of the reduce speed signs.

When operating against the current of traffic in double track territory or when one of the tracks is being used as single track, in either case if the track being used is not signaled for traffic in the direction of the movement, the maximum permissible speed for passenger trains is 59 MPH and for freight trains 49 MPH.

M.P.H.

Through crossovers and turnouts..... 15

Through Nos. 14, 15 and 16 turnouts located at Willbridge, S. P. & S. Jct., Ainsworth Jct., Scribner, east end Overlook Siding, east end South Jct. Siding, United Jct., Bowers Jct. and Forest Grove Jct. 25

Over spring switches not equipped with facing point lock, when moving in facing point direction and not using turnouts..... 30

Over spring switches when moving in trailing point direction actuating switch points and not using turnouts..... 30

Over spring switches when using turnouts..... 15

Freight and road switcher engines, Classes DE single or multiple units of 1500, 1600, 1750, 2400 or 2500 HP used in passenger service, except DE units 151 and 152. 65

Handling steam wrecking cranes, pile drivers or locomotive cranes 30

Handling scale test car..... 30

When freight cars, except those equipped with passenger trucks and steel wheels, are handled in passenger trains, the train will not exceed authorized speed for freight trains in the territory where operated.

When picking up train orders (except where hoop stands are located)..... 25

INTERLOCKINGS

Terminal Subdivision—

	Miles from Portland
Willbridge.....	4.3
Willamette River Draw Bridge.....	5.3
North Portland Junction.....	8.1
Oregon Slough Draw Bridge.....	8.7
Columbia River Draw Bridge.....	9.8

At Willbridge—Whistle signal — • — will be sounded for route to Sixth Subdivision. Upper unit of eastward home interlocking signal governs movements on eastward main track Terminal Subdivision. Lower unit governs movements to Sixth Subdivision.

At North Portland Jct.—Calling for diverging route through interlocking, the following whistle signals will be sounded:

From and to U. P. R. R. • —
 Stock Yards: From S.P. & S. Ry. • — •
 From U. P. R. R. • • • •

At Oregon Slough Bridge—Drawbridge operator subject to call to operate draw for river traffic and can be reached through the Willamette River Bridge (Tel. CA 8-9111, Extension 584) or Columbia River Bridge (Tel. OX 3-5873). Should it become necessary to flag through this interlocking plant, it must be ascertained if the draw tender is not on duty, and then flagmen must precede train and be sure that derails and rail locks are in proper position.

At Columbia River Bridge—The following engine whistle signals will be sounded in calling for route:

Eastward: For N.P. Ry. —
 For S.P. & S. Ry. • • —
 Westward: From S.P. & S. Ry. • — •
 From N.P. Ry. • • • •

Upper units of eastward home interlocking signal governs movement from Terminal Subdivision to N. P. Ry. The lower unit governs movements to S. P. & S. Ry.
